Financials New Modules in Oracle Release 12

Oracle Financials Release 12 features four new modules and a series of enhancements to existing modules and functionalities. The new modules include Oracle Subledger Accounting, Oracle E-Business Tax (EX), Oracle Profitability Manager, and Oracle Financials Services Accounting Hub. Each of these new modules provides businesses with additional tools to streamline financial processes and improve efficiency.

Oracle Subledger Accounting gives an organization the increased control, visibility, and efficiency needed to comply with corporate, statutory, and managerial audit and accounting requirements. Oracle Subledger Accounting allows an organization to establish One Source of Truth for all accounting, reconciliation, and analytical reporting data because it stores General Ledger entries using a common data model. This module also streamlines month-end closing through a common posting engine. Visibility improves when using Oracle Subledger Accounting because it supports multiple parallel accounting representations.

**Subledger Accounting**
A new tool that allows companies to meet multiple GAAP, corporate, and fiscal accounting requirements. Accounting Methods Builder allows users to determine accounts, lines, descriptions, summarization and dates of journal entries. Detailed subledger accounting journals offer enhanced analytics, auditing and reporting.

**Financial Services Accounting Hub**
Users can efficiently create detailed, auditable, reconcilable accounting records from a variety of source systems. This module serves as one enterprise-wide accounting repository to meet various corporate, management and reporting requirements. Oracle Financial Services Accounting Hub forms an integral component of the Finance, Risk and Compliance Architecture for financial services.

**E-Business Tax**
A new tool for tax knowledge management and delivery adaptable to country specific requirements. A single repository for all tax information which can handle very simple to very complex tax requirements. This tax reporting solution includes modifiable tax reporting templates.

**NEW MODULES IN ORACLE FINANCIALS RELEASE 12**
- Subledger Accounting
- Financial Services Accounting Hub
- E-Business Tax
- Profitability Manager

**ORACLE FINANCIALS R12 ENHANCEMENTS**
- XML Publisher at end user’s desktop
- Improvements to Oracle Budgeting
- Multii-Org Access Control
- Intercompany Accounting links Receivables and Payables
- Receivables Gross Margin Analytics
- Revenue Management and matching COGS to revenue
Financials New Modules in Oracle Release 12

Oracle Profitability Manager
This new module provides greater insight into current operations with actionable information for making decisions and facilitating improved profitability. This new tool is a comprehensive solution for the calculation, analysis and reporting of profitability. Oracle Profitability Manager provides analytics across any enterprise in any industry sector by integrating Oracle Performance Analyzer and Oracle Activity-Based Management.

THE IT CONVERGENCE R12 FULL SERVICE VALUE PROPOSITION
Regardless of your R12 needs, ITC's 360° Customer Care philosophy means that you are always supported.
