ICS | IT CONVERGENCE Consulting Services

Identity Management Consulting Services

By developing an Identity Management strategy, an organization can enhance security, provision users quickly, and improve regulatory compliance. Typically, corporate identity infrastructures are fragmented, and this complicates infrastructure management and compromises security. Any organization can streamline its identity infrastructure with the Oracle Identity Management suite. Deploying an effective solution is a challenge because Oracle Identity Management is based on a complex array of interfaced technologies that often require significant changes to business processes.

IT Convergence (ITC) offers end-to-end Identity Management implementation and support services. ITC's expertise covers the entire technology stack. Our Identity Management engineers have worked with the Oracle Identity Management suite since its inception, and they also have exhaustive knowledge of the entire Oracle Fusion Middleware suite. ITC has deployed a host of Identity Management solutions ranging from small internal user directories to large federated identity implementations. We have gained this experience by delivering solutions to mid-sized companies, major universities, and multi-national corporations.

ORACLE IDENTITY MANAGEMENT SUITE COMPONENTS
Oracle Identity Manager
Oracle Access Manager
Oracle Identity Federation
Oracle Internet Directory
Oracle Virtual Directory

Based on this success, ITC has developed a proven, standardized Identity Management implementation methodology that employs effective, short-cycled releases to produce quantifiable results. ITC combines its intimate product knowledge and methodology with hands-on business experience. This means that, when you partner with ITC, we deliver an effective solution by seamlessly integrating the Oracle Identity Management suite with your existing systems.

IT CONVERGENCE IDENTITY MANAGEMENT CONSULTING SERVICES

ITC's Identity Management solutions are implemented by a team of veteran Oracle engineers, architects, developers, and project managers. Our team works with you to define a proactive Identity management strategy. We help you determine which Oracle Identity Management suite components you need to deploy, how to configure them, and how best to manage your Identity Management infrastructure. To accomplish this, we offer the following Identity Management services:

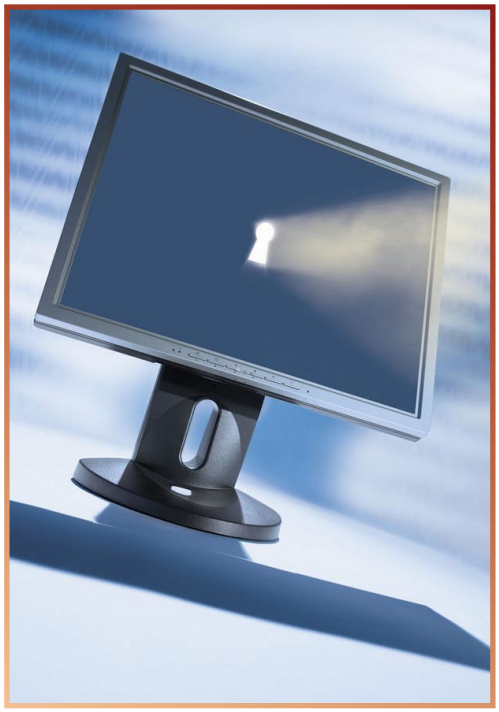
- **Oracle Identity Management Advisory Service**
  Our Oracle Identity Management Advisory Service focuses on educating clients about the Oracle Identity Management suite's capabilities and features. Identity Management advisories feature live Proof of Concept demos that provide first-hand illustrations of an effective solution's benefits.

- **Oracle Identity Management Discovery Service**
  The Oracle Identity Management Discovery Service aims to create a comprehensive corporate Identity Management plan for your organization. Our team works with you to establish your identity management goals and determine a path for reaching them. During every Discovery Service session our engineers complete the following tasks:

- Analyze your organization's current identity stores and infrastructure
- Define organizational goals for identity management
- Recommend specific Oracle Identity Management components
- Demonstrate how your solution will function using a vision environment
- Deliver a plan for implementing a strategic Identity Management solution

Directory Server Integration Services

Many organizations pursue an Identity Management solution in a phased approach and opt to tackle it themselves. For those companies, ITC offers a comprehensive assessment of a current as-is deployment and returns a deep-dive analysis with best practice comparisons, performance benchmark analysis, and solution architectures for future deployment phases.



Oracle Identity Management Solution Design and Implementation

Designing and implementing an Identity Management solution can be a complex process because it involves deploying new technologies, redefining business processes, and enforcing new security policies to mitigate risks. Consequently, a tight scope must be maintained on Identity Management solution implementations. ITC has both the technical expertise and project management experience to ensure that your project stays in scope. Whether you simply want to integrate directories, or you need comprehensive Identity Management services, ITC Identity engineers ensure that your solution is implemented correctly the first time.

Regulatory Security Compliance and Auditing Solutions

Access control and auditing have become a regular, but costly, part of doing business because of Sarbanes-Oxley and other regulations. ITC can provide your organization with a single, centrally managed interface that serves all of your corporate resources. This will provide auditability and accountability for every account within every resource in your organization, and corporate dashboards will instantly provide data on user additions/removals and access privileges.

SIMPLIFY IDENTITY MANAGEMENT WITH ITC

Identity Management will become more complex as technology advances and its strategic value to business grows. ITC can help you simplify this challenge so that you can concentrate on what matters most: your core business. We do this by employing a proven, standardized methodology for planning, implementing, and administrating an effective Identity Management solution. The keys to ITC's success are our experience, our familiarity with the Oracle Identity Management suite, and our expertise, which spans the entire technology stack. Contact IT Convergence today to learn more about how we can help you simplify the management of your IT access infrastructure, speed up the provisioning of users, and improve the overall security of your environment.
